

Effectiveness And Practicality In Operating: Citation MANAGETM

Citation Manage is a Cloud- platform providing a systemic approach to help companies manage federal, state, and international laws and regulations more effectively, reduce environmental management costs and impacts, gain advantages in the marketplace, and achieve corporate ESG and sustainability.

Have assurance that your organization consistently achieves and sustains EHS compliance with all applicable regulatory agencies.

How Citation Manage Works

Users can build a complete compliance assurance management system by determining their legal register of applicable requirements, deciding on which regulatory mandated actions are required, and creating tasks that take those actions to the point of compliance in the field. These tasks include owners, due dates, and frequency, along with cloud-based evidence record capability.

In addition, regulatory updates associated to your project or any new regulations are automatically loaded into the system for your review. Here you can create a new version, with old versions of data saved and kept at the company's disposal; This will assist with both internal and external audits, and compliance processes, by ensuring data is stored from specific times.

▲ **REDUCE OVERHEAD AND RISK**

▲ **INCREASE PROFIT AND COMPLIANCE**

Key Advantages

- Cost-effective solution to minimize risk and maintain compliance
- Personalized framework with fine-tuned applicability to meet your organization goals and requirements
- Backed by 25+ years of domain expertise, both in the United States and international markets
- Preserve corporate memory and consistency across all company locations with the use of one platform

Citation's Manage platform provides **more than regulatory content** by incorporating versioning, task writing, permit requirement tracking, risk assessment capabilities, and audit functionality. You can even build your EHS Legal Register or work on Sustainability Initiatives and ESG metrics all within Citation's robust solution for EHS professionals.

How Citation MANAGE™ Compares:

	CITATION MANAGE™ - INCLUSIVE SOLUTION	SPECIALIZED SOLUTION
	Small/medium scale operations who are looking for an affordable total compliance solution.	Large scale operations who need applicability services for multiple operational sites.
Define regulatory applicability at the site and operation level through "yes or no" questions	^	^
Support in achieving ISO Certifications and ANSI standards through the creation of a high-quality Regulatory Register	^	^
